

# Stephen Fuhr

Member of Parliament for Kelowna-Lake Country

## We are delivering results for Canadians in British Columbia

**Today, more Canadians have a job and we have the fastest growing economy in the G7. Within the last two years we have created 450,000 jobs. We are also enhancing the Working Income Tax Benefit by \$500 million.**

- ✓ Canada has the fastest growing economy in the G7 and we are reinvesting the benefits of that growth back into the people who contribute most to that success.
- ✓ Helping more working Canadians keep more hard-earned money from every paycheque by further enhancing the working Income Tax Benefit to help 1.4 million Canadians..
- ✓ The Government's proposal to lower the small business tax rate to 9% effective January 2019 will mean up to \$7,500 in federal corporate tax savings per year to help entrepreneurs and innovators succeed.

### Enhancing the Working Income Tax Benefit

**OVER 1.5 MILLION LOW-INCOME WORKERS WILL RECEIVE SUPPORT TO ADVANCE THEIR CAREERS AND PROVIDE FOR THEIR FAMILIES.**

### Investing \$500 million to expand the Working Income Tax Benefit

*"A more robust and generous Working Income Tax Benefit is smart social policy, and the proposals are a step in the right direction #cdnecon"*

**Miles Corak,  
Professor of Economics at University of Ottawa**
